Notes: Ratings explanation - (1) projected labour supply is expected to be able to meet projected job openings, and an excess supply of workers may exist. (2) balanced outlook; projected labour supply for the occupation is expected to be able to meet projected job openings. (3) slightly tighter rating than 2; new labour supply will be required to meet anticipated job openings in this occupation. (4) projected labour supply is expected to lag projected job openings; competition for qualified labour will be strong.
